## Final Project Completion Report

Project Name and Number: JVWTP Plant Reclaim Water and Solids Handling Improvements, \#4072
Description: The treatment process at the Jordan Valley Water Treatment Plant removes solid material from the raw water through filtration. Filter backwash water is settled to concentrate the solids. Reclaimed water is circulated back to the beginning of the treatment process. This project upgrades the backwash solid handling system routing "first water" via a "scalping" vault for storage in the sludge lagoons. The project also adds concrete liners to the backwash basins.

## District Project Manager: David McLean, PE

| Engineer: Carollo Engineers | Design Status: 100\% |  |
| :--- | ---: | ---: |
| Original Engineering Contract Amount: |  |  |
| Final Engineering Contract Amount: | Construction Status: 100\% | $\$ 503,533$ |
| Contractor: Nelson Brothers Construction | $\$ 575,355$ |  |
| Original construction contract amount: | $\$ 2,864,643$ |  |
| Total Change Order amount: | $\$ 277,246$ |  |
| Final construction contract amount: | $\$ 3,141,889$ |  |
| Total change orders as a percentage of original contract: | $9.7 \%$ |  |
| Completion Schedule: |  |  |
| Notice to Proceed:  <br> Final Completion: $10 / 20 / 2020$ |  |  | | $6 / 1 / 2022$ |
| :--- |

| Summary of Change Orders: <br> Description |  |  |
| :--- | :--- | ---: |
| 1 | Repair east reclaim pump and other items. | Amount |
| 2 | Additional sludge removal (west basin) | $\$ 22,733$ |
| 3 | Electrical conduits, pipe excavation, pump repair. | $\$ 48,046$ |
| 4 | Piping modifications and additional fill material. | $\$ 47,727$ |
| 5 | Additional sludge removal (east basin) | $\$ 35,096$ |
| 6 | Additional concrete in basins. | $\$ 33,618$ |
| 7 | Adjust asphalt quantities | $\$ 30,530$ |
| 8 | Flowable fill, manhole, and concrete. | $\$ 42,048$ |
| 9 | Asphalt credit and other minor items. | $\$ 24,436$ |
|  | Total Change Order Amount: | $-\$ 6,988$ |
|  | $\$ 277,246$ |  |

Final Project Completion Report

Cleaning of un-lined backwash basins.

Installing new sludge piping.

Successful start-up of new process.

Lining of east backwash basin.

"Scalping" vault placement

Construction overview
